BRITISH LEYLAND MOTORS INC.
600 Willow Tree Road • Leonia • New Jersey 07605

SUBJECT:

Automatic Transmission Fluids

MODELS:

MGC

It is important that only automatic transmission fluid to the specification M2C 33 F (Ford type fluid) is used for topping up and filling the Borg-Warner 35 transmissions in the above model.

Most major oil company service stations have two types of automatic fluid available. The M2C 33 F Ford type fluid and DEXRON General Motors type fluid.

The DEXRON General Motors type must NOT be used.
